RE: University Retention Rate by Age

Hi Clint,

Here is my analysis of the statistics we received yesterday:

I separated the population of university students into a sample group. There are 1,000 students in the sample, with a range between eighteen and twenty-two years old. We analyzed how many of them transferred or drop out at that age. The mode is 19, the median is 18.5, and the mean is 18. Conclusion: Students are most likely to leave school between ages eighteen and nineteen.

The university requested recalculations before we submit our findings. I attached a copy of the raw data. That way, you can perform the calculations yourself. I didn't calculate the mean absolute deviation. Would you do that? Also, make sure to highlight any variations or deviations in the data set. We'll have to account for any variance.

Let me know if you have any questions.

Natasha

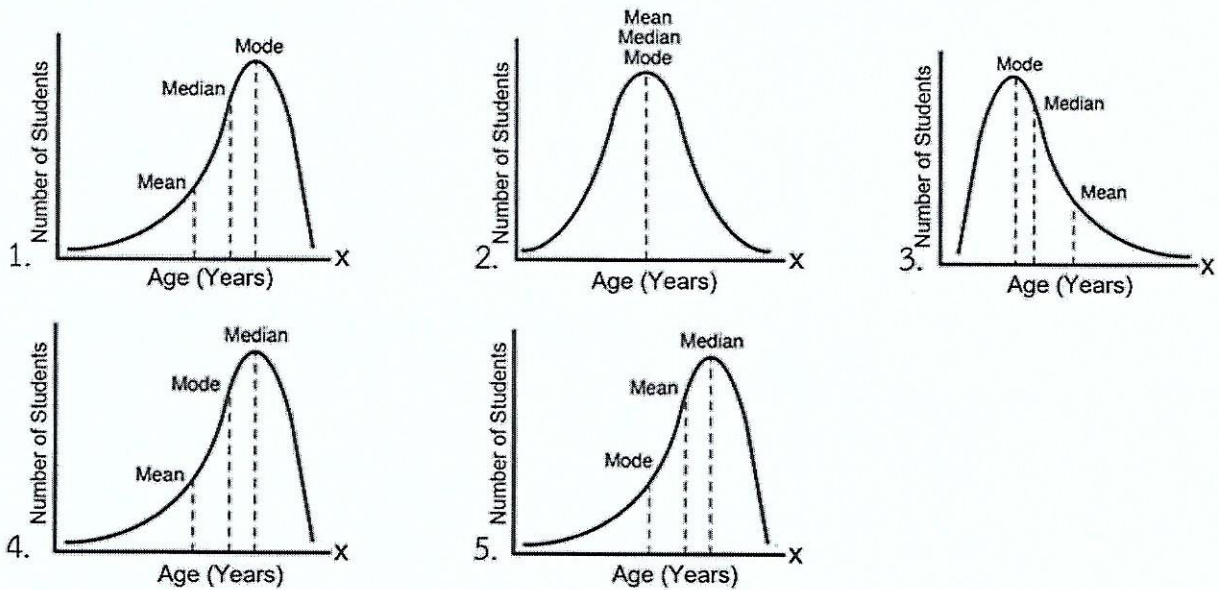

51. What is the objective of the mentioned analysis in the email?

1. to check for any variations or deviations in the data set
2. to find out at which age students are most likely to leave school
3. to separate the samples of university students into a population group
4. to conclude that students most likely to transfer or drop out after twenty
5. to request recalculations before they submit the findings to the university

52. Which of the following is attached to the email?

1. a copy of the raw data
2. a peer review of the analysis
3. an interpretation of the data
4. a detailed description of the sample group
5. to conclude that students most likely to transfer or drop out after twenty

53. Which of the following figure can best represent the analysis in the email?

For Items 54 – 55 Read the following paragraph and choose the best answer to the questions.

Why do fashions occur in the first place? One reason is that the values are changing what is new is good. In many modern societies, clothing styles changes through seasons. Another reason is that fashions are promoted to increase their sales. That is why fashions occur and change rapidly. The third reason is that fashions are stimulated by people in the society. For example, some new styles, such as blue jeans, can occasionally come from the working class and can be adopted by the middle-class.

54. What is the main idea of this passage?

1. Why fashions change rapidly.
2. Fashions occur for several reasons.
3. The societies can cause fashion's changing.
4. There are the reasons why fashions are popular these days.
5. There are four reasons that fashions occur and change rapidly.

1. New is always good for fashions.
2. Season is not related to clothing styles.
3. There are three reasons that fashions occur and change rapidly.
4. People in the society is one of the reasons for changing fashions.
5. Some new styles of the working class can be adopted by the middle-class.

For Items 56 – 58 Read the following paragraph and choose the best answer to the questions.

Too Much Technology

Have you ever walked down the street and noticed that almost every single person is walking with their face down watching on the screen? It seems that technology has completely taken over lives today! Kids aren't getting outside and playing anymore, so they don't have imagination and they certainly aren't getting any exercise. Too much technology in our lives means that we don't have real conversations and therefore we are becoming disconnected from each other. Technology makes us stressed and *frustrated*, so it is time that we take a break and drag our eyes away from the screens.

Children today lack imagination and aren't able to just go outside and play. They spend so much time staring at a screen and playing games that they no longer have the skills needed to be creative and have fun without technology. All this time spent sitting down using technology is definitely bad for the health of the children in our country. Kids should be out in the fresh air, running around, and having fun, not shut in a dark, dreary room staring at a screen like zombie.

Technology is also tearing families and friends apart. Instead of having real conversations with our family and friends, we are having disjointed and unrealistic conversations using social media. This means that we aren't really show each other our true selves. We need to have face to face conversations in order to truly connect with people. Is it really that hard to put down the phone and have the proper conversation with someone?

It is also important to realize that technology can make us frustrated and angry. This is especially true when things start to break down and not work. Staring down at a screen all day is not good for our mental health and make up tired and irritated. Everyone would be so much happier if they gave up the technology and went outside for a lovely long walk or had a nice picnic. Technology is annoying, irritating, and awful.

Overall, it is very clear that our lives would be so much better with less technology. Instead of playing computer games and using social media, children could get outside in the beautiful fresh air and enjoy the sunlight. They would be healthier and fitter if it weren't for technology. All this technology is detecting people and preventing us from really connecting with each other. We would be less grumpy and irritable if we weren't spending our days staring at a screen. It's time to really be together and get rid of all this technology to create a happier healthier society!

56. What is the passage mainly about?
- | | |
|------------------------------------|------------------------------------|
| 1. The benefits of technology | 2. The generation of technology |
| 3. The new creation of technology | 4. The process of using technology |
| 5. The bad effects from technology | |
57. According to the passage, which sentence is CORRECT?
1. Technology is the tool which makes people happier.
 2. Technology should be used less in people's daily lives.
 3. Technology is the main factor of developing imagination in children.
 4. Technology can make the relationship of families and friends better.
 5. Technology is the best way to improve mental and emotional health.

58. What does the word "*frustrated*" mean?

- | | | |
|-----------------|----------------|--------------|
| 1. delighted | 2. joyful | 3. satisfied |
| 4. disappointed | 5. embarrassed | |

For Items 59 – 60 Read the following webpage and choose the best answer to the question.

Gears & Gadgets

> About us > Our Process

Before we release a product, it goes through a careful analysis and design. We follow the same steps from initial conception to final release. These steps help us give you the best products we can.

1. Identify a gap in the market through research.
2. Verify the need for a new product through focus group.
3. Perform a feasibility study before any design work begins.
4. Assemble a team of designers to submit sketches for further research.
5. Narrow submissions down to find a promising preliminary design.
6. Request a more detailed design from an expert designer.
7. Construct a model for targeted analysis, and to estimate cost.
8. Isolate any design constraints that are evident in the model.
9. Review criteria for usability, functionality, marketability, and style.
10. Perform the final round of market research with a preliminary version of product.
11. Release the product to the general public.

59. Which of the following is NOT part of the design process?
